

Science the fun way

Ruimsig — In South Africa, school pupils do not take mathematics and science, as they do not enjoy it.

Going against the norm, five Grade 7 Maragon pupils took part in the Eskom Science Expo at the University of the Witwatersrand and enjoyed every part of it.

On Friday, 29 July, the five Maragon pupils went to represent their school at the regional round of judging at Wits.

Mira de Cramer, Christopher Evgeniou, Jean André Cilliers, Tristan Geerlings and Cameron Wills outdid themselves as they came back with a

variety of medals to show at the school.

Maragon obtained bronze, silver and gold medals.

There was a further round of pre-national judging held at Saint Suthians Boys' College on Wednesday, 3 August for those who received gold medals.

These students will represent the Johannesburg region in the Eskom Expo for Young Scientists 2011 National Finals.

The finals will take place at Birchwood Hotel and Conference Centre in Boksburg from 6 to 8 October.
